UL Safety Listed & Performance Tested

- **Unmatched Performance, Lowest Operating Costs**

With over 30 years of heat pump pool heater design experience, AquaComfort is built to outperform the competition. Advanced micro-computer technology and exclusive design features result in 25% more heating performance than other leading heat pumps. All AquaComfort pool heaters are equipped with Turboguard™ – the most advanced heat exchanger available.

- **Built Better to Last Longer**

Every AquaComfort pool heater must pass strict quality control standards. In fact, our pool heaters are engineered to last nearly twice as long as standard fossil fuel heaters. And, the AquaComfort design is as attractive as it is durable.

- **Manufacturing Excellence**

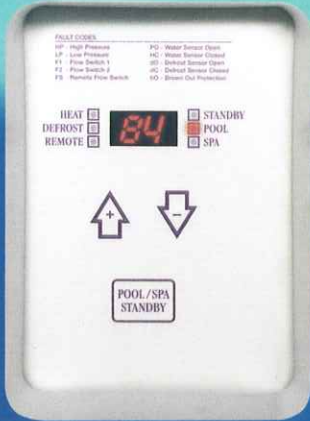

Our state-of-the-art facility produces more than 25,000 heat pumps a year, is built to ISO standards and our testing lab is the best in the industry. With over 20 years of manufacturing excellence and experience, performance and customer satisfaction are guaranteed.
